PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience building, integrating, and maintaining scalable web and application backend systems using Node.js, Express.js, NestJS, TypeScript, JavaScript, MongoDB, and MySQL.

Experienced in RESTful API development, authentication and authorisation, third-party API integration, database management, debugging, production issue resolution, and frontend-backend integration. Hands-on experience contributing to multi-tenant SaaS platforms, web applications with exposure to gaming platforms, CRM/CMS modules, KYC workflows, user management, promotions, reporting, and administrative systems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Backend: Node.js, Express.js, NestJS, RESTful APIs, BullMQ

Frontend: React.js, Next.js

Databases: MongoDB, MySQL, Redis

Development Tools: Git, GitHub, Postman

AI Tools: Cursor, ChatGPT

Backend Concepts: API Integration, Authentication, Authorisation, Background Jobs, Queue Processing, Caching, Database Operations, Business Logic Implementation, Debugging, Error Resolution, Third-Party API Integration, Multi-Tenant SaaS Architecture

PROFESSIONAL EXPERIENCE

MERN Developer - Elaunch Solution Pvt. Ltd. | October 2024 – August 2026

Contributed to **Playage Gaming**, a multi-tenant SaaS-based iGaming ecosystem supporting online casino and sportsbook operations. Worked across centralised Backoffice, CRM, CMS, BAS, Master Panel, and customised client-facing platforms.

Technologies: Node.js, NestJS, TypeScript, MongoDB, React.js, Next.js

- Developed and maintained RESTful backend APIs and integrated APIs with React.js and Next.js frontend applications.
- Worked with Node.js, TypeScript, JavaScript, MongoDB, React.js and Next.js across multiple production modules.
- Developed and maintained functionality related to authentication, player management, KYC verification, VIP levels, promotions and other administrative operations.
- Contributed to reporting dashboards and operational modules used within centralised management platform.
- Ensure reliable frontend to backend integration across administrative and user facing applications
- Supported customised user facing platforms for multiple iGaming clients within a multi tenant SaaS architecture.
- Maintained existing application functionality and implemented enhancements based on business and client requirements.

Product: [Playage Gaming](#)

User Platform: [DedemanCasino](#) || [ApexCasino](#) || [Eforbet](#)

Freelance Backend Developer | June 2024 – September 2024

Worked as a freelance Backend Developer on web application projects, primarily focused on backend API development using Node.js, Express.js, and MongoDB. During this period, also focused on expanding frontend development skills by learning and working with React.js.

Backend Developer - Liger Infotech | August 2023 – May 2024

Responsible for developing and maintaining backend services and APIs for multiple web and mobile applications.

Technologies: Node.js, Express.js, MongoDB, REST APIs, Postman

Key Projects

Anime3D – iOS Application

Developed and maintained backend APIs for a wallpaper-based mobile application, managed application data and backend operations, and supported API integration between the iOS application and backend services.

The Game Company – Android Application

Designed and developed REST APIs for managing and delivering game-related information, supported direct game-access functionality, and handled backend data processing and API responses required by the Android application.

US Citizen Case Status – iOS Application

Developed backend APIs for retrieving immigration case-status information, integrated external government data sources, and processed and delivered case-status data to the iOS application through backend services.

Click To Chat – iOS Application

Developed and maintained backend APIs for a sticker-based mobile application, managed sticker packages and related backend data operations, and supported reliable API functionality for the iOS application.

Trainee / Junior Backend Developer - JNext Services | February 2022 – June 2023

Started as a trainee and progressed into a Junior Backend Developer role, contributing to backend application development under the guidance of senior developers and team leads.

Project: Sezz You

Discussion and conversation platform where users interact on different topics.

- Developed backend APIs required by the application
- Fixed backend bugs and issue identified during development and testing.
- Assisted in maintaining and improving existing APIs

EDUCATION

Bachelor of Computer Applications (BCA)

Maharaja Krishnakumarsinhji Bhavnagar University (MKBU)

Bhavnagar, Gujarat, India

June 2018 – July 2021
